

CSE445/598 Gradescope Assignment Submission Tutorial

Please follow this tutorial to submit your assignment. This is a short tutorial. A link to a longer and more detailed tutorial is given at the end of this document.

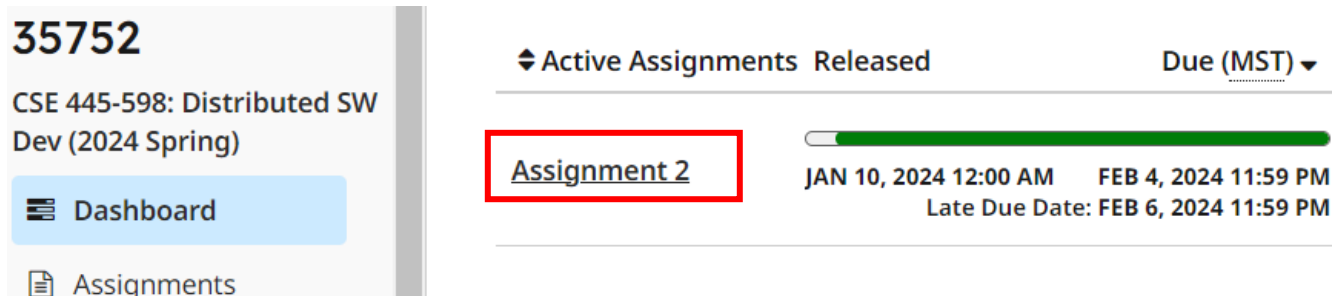

Step 1. Find Gradescope in your Canvas Course page:

If you have already used Gradescope in other courses, you can enter from your Gradescope account and find this course as follows:

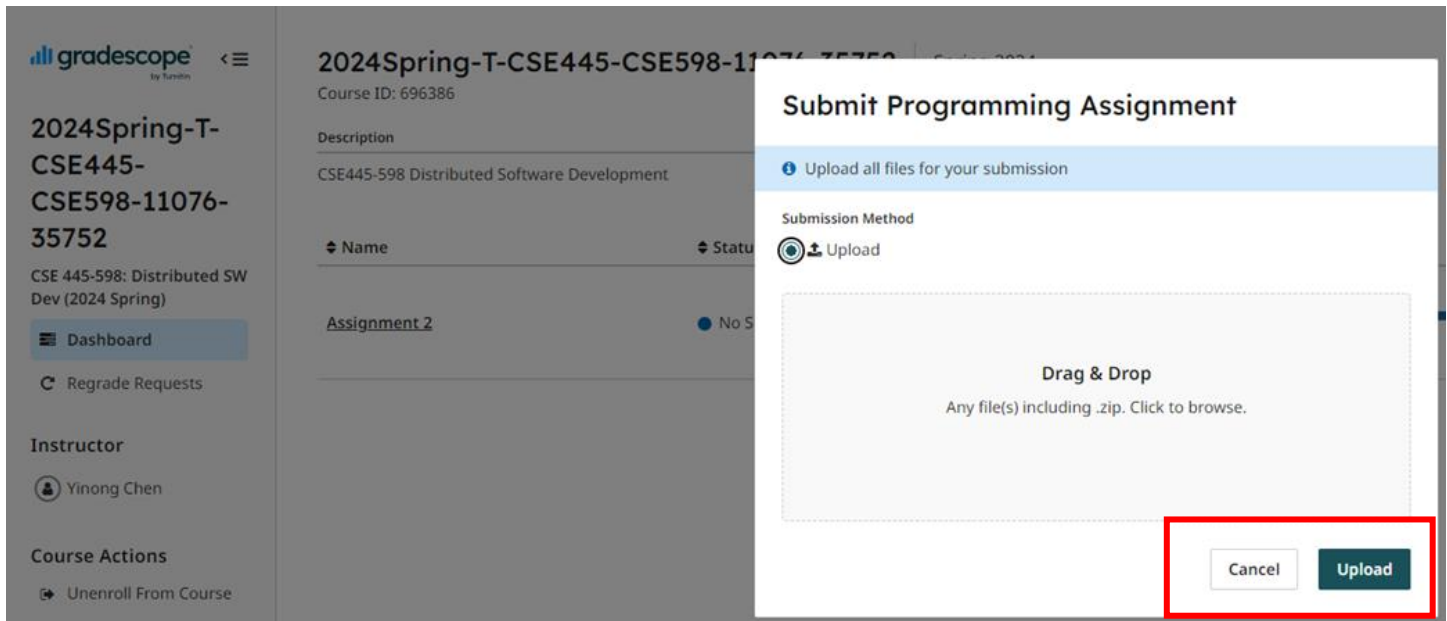

Step 2. Click and Enter the Assignment page:

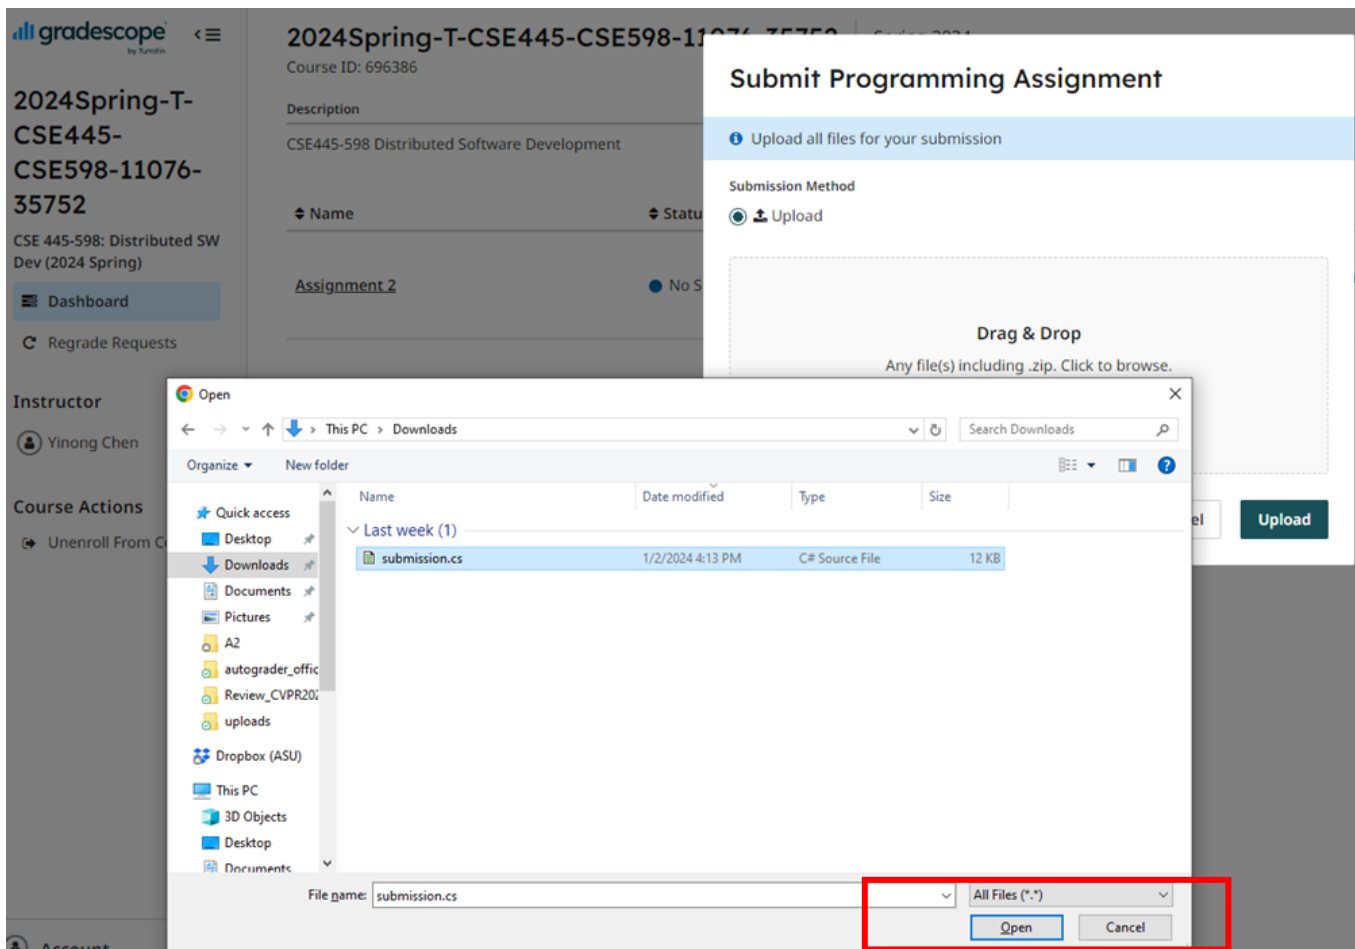

Step 3. Make sure that your code file is named: [submission.cs](#)

Either drag and drop the code file into the submission window or use the selection option:

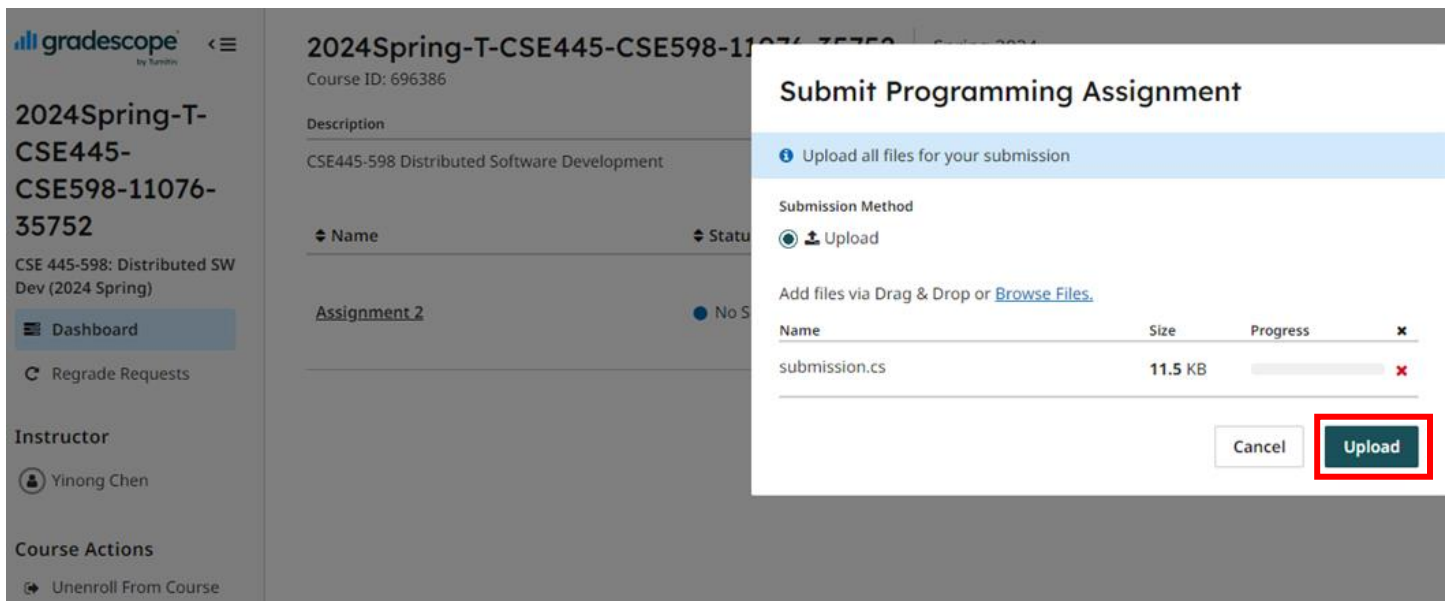

(1) Drag and Drop:

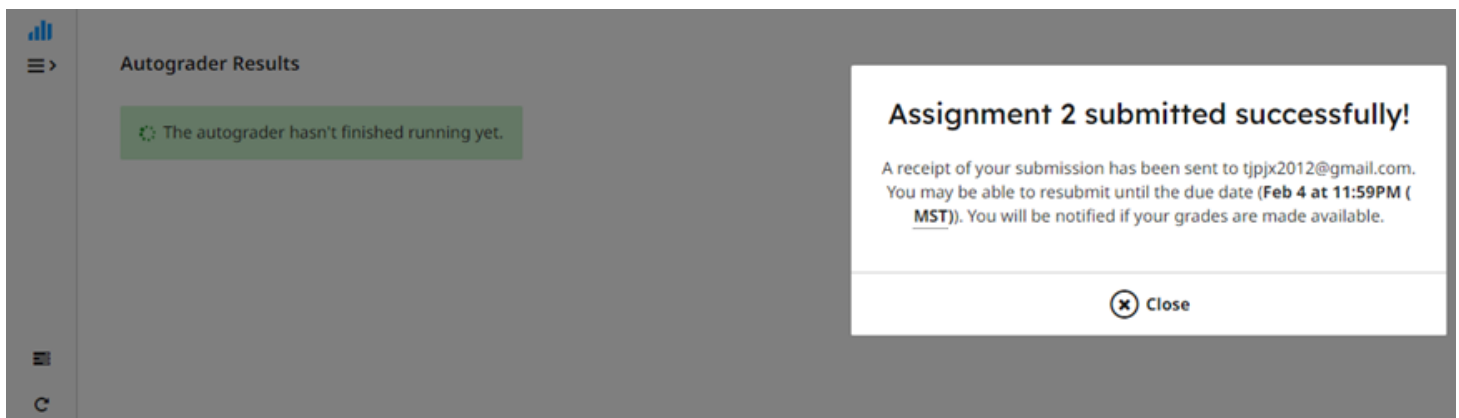

(2) Or, use selection option:

Step 4: Click “Upload”

You should see now: Your code is uploaded successfully.

Upon reaching this page, your code will undergo automatic grading by the autograder. This procedure might take up to 120 seconds.

It's important to note that the autograder has a timeout limit of 10 minutes. In case your code enters an infinite loop, it will be terminated after reaching the 10-minute timeout limit.
